

## GSOEP - Interviewer Data Set (1984 - 2005)

This interviewer data set contains information about sex, age, education, occupation and marital status from 1606 interviewers that work on sample A, B, C, D, E and F from survey wave 1 up to 22. For this time period this information can be matched by the interviewer number to the GSOEP samples for this time period.

There are different interviewer number variables for the east and west interviewer staff till wave 12. From wave 13 onwards the interviewer numbers for the east interviewer are changed. The variable `IBB_INR` contains only interviewer numbers from the east interviewers from wave 7 up to 12. The variable `INTNRALT` contains the interviewer numbers from east and west interviewers till wave 12. (Caution: Infratest assigns three identical interviewer numbers 9806; 19852; 19887 for east and west interviewers!!)

The variable `INTNR` comprises interviewer numbers from west interviewers (sample A and B) from wave 1 up to 20 and the new numbers for the east interviewers that are applied to wave 13 onwards.
