Person-related variables on children (up to the age of 16) within the household

General information:

The variables from the annual \$KIND files described in the following are not based on answers provided by the children themselves but by answers to the household questionnaire provided by the respondent within the household (head of household). This data is re-aggregated on the person level and saved as child-specific entries in the file \$KIND.

The annual \$KIND datasets also contain additional information on institutional care and school attendance for children and young people; in selected waves, questions on the costs of childcare as well as non-institutional care arrangements are also asked (these variables are not described here).

The entries in \$KIND are identifiable with the Codes “20 to 22” in the wave-specific variable \$NETTO (in the file PPFAD) or the code “2” in the variable \$NETOLD. .

SAMPEL

Var Label : SAMPEL **Sample membership**
Value Label : SAMPEL (1)German household head
(2)Turkish household head
(3)Yugoslavian household head
(4)Greek household head
(5)Italian household head
(6)Spanish household head
Var format : SAMPEL (I1)
Waves A - D

Comment: Sample membership for head of household based on his/her nationality. Code 1 is for Sample A (West German, without household heads who belong to Sample B), Codes 2 to 6 constitute Sample B. This data is not time-dependent.

Joachim Frick (Tel. +49-30-89789-279)

WAVE

Var Label : WAVE **Wave**
Var format : WAVE (I2)
(Waves A - BA)

Comment: Up to 1999 (Wave P) this variable is the survey year; since
2000 (Wave Q) it is the wave number, with first wave in 1984
(e.g. 17 for Wave Q).

Detailed description:

For more information, contact: Joachim Frick (Tel. +49-30-89789-279)

\$KGEBURT

Var Label : \$KGEBURT **Year of birth**
Var format : \$KGEBURT (I2)
\$ - wave : \$=A..C

Comment: Year of the child's birth (2-digit). The value of \$KGEBURT can in some cases diverge from the longitudinally tested data in the central file PPFAD (variable SEX).

Detailed description:

For more information, contact: Joachim Frick (Tel. +49-30-89789-279)

\$KGJAHR

Var Label : \$KGJAHR **'Year of birth'**
Var format : \$KGJAHR (I2)
\$ - wave : \$=D..P

Comment: Year of birth of the child (2-digit). Change in variable name because of the addition of a variable on month of birth (variable \$KGMONAT) in 1987 (Wave D). The value of \$KGJAHR can in some cases diverge from the longitudinally tested data in the central file PPFAD (variable GEBJAHR).

Var Label : \$KGJAHR **'Year of birth'**
Var format : \$KGJAHR (I2)
\$ - Wave : \$=Q..BA

Comment: Year of birth of the child (4-digit). The value of \$KGJAHR can in some cases diverge from the longitudinally tested data in the central file PPFAD (variable GEBJAHR).

Detailed description:

For more information, contact: Joachim Frick (Tel. +49-30-89789-279)

\$KGMONAT

Var Label : \$KGMONAT **Month of birth**
Var format : \$KGMONAT (I2)
\$ - Wave : \$=D, T

Comment: The child's month of birth was asked in 1987 and 2003 in the household questionnaire. Month of birth of all persons is saved as the variable GEBMONAT in the file PPFAD.

\$KSEX

Var Label : \$KSEX **Sex**
Value Label : \$KSEX (1)male
(2)female
Var format : \$KSEX (I2)
\$ - Wave : \$=A..BA

Comment: Child's sex. The value of \$KSEX can in some cases diverge from the longitudinally tested data in the central file PPFAD (variable SEX).

\$KHV

Var Label : \$KHV **Pointer to HH head**
Var format : \$KHV (I6)
\$ - Wave : \$=A..BA

Comment: Generated as PERSNR of the HH head (i.e., person with \$STELL=0 in the wave-specific file \$PBRUTTO.

\$KHVP

Var Label : \$KHVP **Pointer to partner of HH**
Var format : \$KHVP (I6)
\$ - Wave : \$=A..BA

Comment: PERSNR of the partner of the head of household. It is defined by combining the variables \$STELL (relationship to HH) in the wave-specific file \$PBRUTTO of the respective individuals and takes into account - if applicable - the partner information (pointer to spouse or partner: variable PARTNR\$\$) from the wave-specific file \$PGEN.

\$KMUTTI

Var Label : \$KMUTTI **Pointer to mother**
Var format : \$KMUTTI (I6)
\$ - Wave : \$=A..BA

Comment: PERSNR of the child's mother. After extensive testing of the distribution of the data up to that point, the pointers to mother (Variable \$KMUTTI) and mother's partner (Variable \$KMUP) were revised in July 1994 for SOEP Waves 1 (1984) to 10 (1993) since in some cases these variables showed a very high percentage of missings. The procedure for generating the pointers was modified to define the mother-child relationship as a combination of the variables \$STELL (= relationship to HH head in the wave-specific files \$PBRUTTO). The definition of mother's partner is derived from the variable PARTNR\$\$ (=person ID number of spouse or partner) which is taken from the wave-specific files \$PGEN or, when this data is lacking (if no interview took place with the partner), from the combination of relationship to HH head of the mother and of the mother's partner.

In this context, for Waves 1 to 10, the newly generated pointers were tested longitudinally over time for consistency. While it is quite realistic that a mother would change partners over time (e.g. due to second marriage after the death of her partner, or due to separation from her first partner), it seems less plausible that there would be pointers to different mothers for the different waves. According to a strictly biological definition of motherhood, this would certainly not be possible; but according to a social definition of motherhood, it would be possible to have a new "social" mother after the biological mother dies or moves out. This problem is quantitatively insignificant, however (e.g., a changing mother pointer was only identified for 29 children in total from Waves 1 to 10 (\$KMUTTI)).

Further information on the definition of (social/biological) mother-child relationships in SOEP can be found in the BIO documentation for the file BIOBIRTH.

\$KMUP

Var Label : \$KMUP **Pointer to mother's partner**
Var format : \$KMUP (I6)
\$ - Wave : \$=A..BA

Comment: PERSNR of the partner of the child's mother (cf. PARTNR\$\$ of the mother in the person-related file \$PGEN).
Please see also the description of the variable \$KMUTTI.

INSTITUTIONAL CARE (since wave Z)

BAK6502

Var Label : **None of these schools**
\$ - Wave : Z, BA

Comment: Up to and including wave Y (2008) there is only one single variable summarizing the information on whether a child does not attend "general school" or "Kindergarten, crèche and nursery". In wave Z (2009) this item comprises only information on "no school attended". This excludes the information whether a child does or does not attend a "kindergarten, crèche or nursery". **(Please see table below for a synopsis of all respective variables collected in waves A...BA)**

BAK6701

Var Label : **Kindergarten, crèche and nursery**
\$ - Wave : Z, BA

Comment: Up to wave Y (2008) this information was coded as a separate item "Kindergarten, crèche and nursery" in the general school variable. Code "2" of this variable contains information that "none of these institutions are attended".

COSTS FOR SCHOOL; CARE AND ACTIVITIES (new in wave BA)

BAK7001

Var Label : **average monthly cost**
\$ - Wave : BA

Comment: With wave BA (2010) a new instrument was introduced within the Household Questionnaire regarding children <16: **How much do school, care and activities above cost you?** Parents indicate average monthly cost of their children regarding school, care, and (leisure) activities, e.g. early music education, sports, or visiting youth centre. **(Please see table below for a synopsis of all respective variables collected in waves A...BA)**

BAK7002

Var Label : **No costs**
\$ - Wave : BA

Comment: Corresponding to parents' estimation of average monthly cost of school, care, and activities a variable "no costs" indicates if parents do not have any costs.

In addition to the variables described above, variables on specific topics that are not surveyed every year are an important part of the data stored in the files \$KIND. The following table contains information on variables that are asked every other year. **Please note that the variables are sorted according to topics and that some have been modified in the course of the time.**
