

We are an economics consulting company with a clear focus on business clients and internationals.

Our clients are facing major decisions and need precise knowledge about the consequences of their choice.

We deliver applied analysis by making the data tell their story.

Our work is based on modern economic insight, advanced economic tools and real world data.

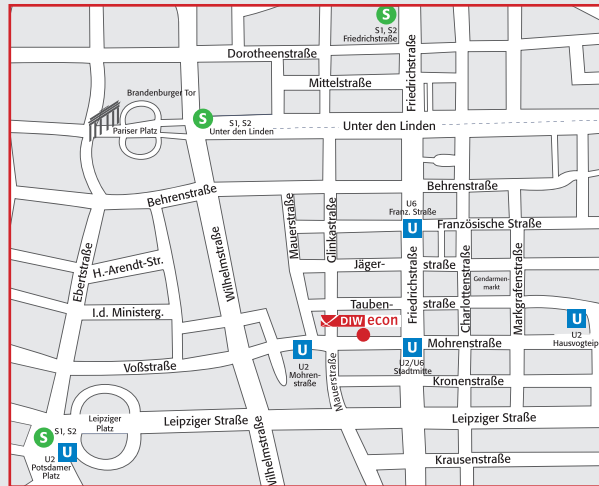

We produce concise and state of the art research.

We achieve excellence through the combination of strong academic research and experienced consultants.

Our competitive edge

We are a 100 % subsidiary company of the German Institute for Economic Research – DIW Berlin. Prof. Klaus F. Zimmermann is president of the DIW Berlin.

We work integrated with Germany's largest and renowned economic research institute.

We have full access to the resources of our parent company, including:

Scientific personnel, models data, and world wide research networks.

We work in flexible and tailor made project teams.

We offer our clients the option to publish the results of our investigations through the DIW Berlin.
