SOEP-IS Group

June 5, 2015

## Reading Aid

This representation of the questionnaire contains the same informations as SOEPinfo at [data.soep.de](http://data.soep.de).

The diagram illustrates the structure of a questionnaire question with the following elements and annotations:

- question number:** Q72
- question text:** Now we would like to know something about you personally. Were you born in Germany?
- interviewer instruction:** This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.
- answer options:**
  - Yes (1)
  - No (2)
  - No answer (-1)
- in blue: identifier for filter:** Q72;lsta1
- in blue: filter with condition:** LSTA1=2
- in green: dataset name, variable name, variable label:** bio I0013 born in Germany
- grey bar: open or numeric answer:** Q73;lsta2 bio I0016 Country Of Birth

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a “go to” command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].
