DFG Deutsche
Forschungsgemeinschaft

DFG-funded project (2023–2026)

Goals of the project

Easy linking of social science and spatial science research data:

- in a data protection-compliant manner,
 - enabling the analysis of interdisciplinary research questions
-
- Public and private mode (internal or external of secure rooms)
 - Structure dataset of coordinates (to test linking outside of secure rooms)
 - Data protection compliant (user can not access the coordinates)
 - Open Source & FAIR-principles (replicable, provenance data)
 - Extendable to other social or spatial research data centers

General Workflow
