1 General Information

The aim of the data file BIOPAREN is to provide a basic dataframe with pointers to parents in SOEP-IS with the variable PID as unique identifier. The generation is based on the BIO-BIRTH dataset. In the current version of the dataset, only individuals with a father, a mother, or a father and a mother are included. Parents to whom no gender can be assigned are not included. Also not included are people who, according to the data, have two same-sex parents. The current format of the dataset requires the mother/father to be uniquely identified. However, these persons are included in BIOBIRTH and can be identified there.
