The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)
Series B – Survey Reports (Methodenberichte)
Series C – Data Documentation (Datendokumentationen)
Series D – Variable Descriptions and Coding
Series E – SOEPmonitors
Series F – SOEP Newsletters
Series G – General Issues and Teaching Materials

Reading Aid

This representation of the questionnaire contains the same information as the portal `paneldata.org`.

question number → **Q72**

question text → **Now we would like to know something about you personally. Were you born in Germany?**

interviewer instruction → *This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.*

answer options → Yes 1
No 2
No answer -1

in blue: identifier for filter → **Q72:lsta1** bio I0013 born in Germany

in blue: filter with condition → **Q72:lsta1=2**

grey bar: open or numeric answer → **Q73** What country were you born in?
Please enter the current name!

in green: dataset name variable name variable label → **Q73:lsta2** bio I0016 Country Of Birth

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or information is stored in more than one dataset.

The *routing by filters* is depicted in blue.

Each variable is preceded by an identifier, which usually contains the question number and which is used when the variable is used in filters in subsequent questions. Such filters are usually placed as input filters (gatekeepers) at the beginning of a question. An identifier that is referred to in the input filter of a subsequent question is marked yellow as an example.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if answer 2 was given.

Phrases that are not already translated in English are displayed in German and preceded by [de].
