Reading Aid

This representation of the questionnaire contains the same information as the portal `paneldata.org`.

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or information is stored in more than one dataset.

The *routing by filters* is depicted in blue.

Each variable is preceded by an identifier, which usually contains the question number and which is used when the variable is used in filters in subsequent questions. Such filters are usually placed as input filters (gatekeepers) at the beginning of a question. An identifier that is referred to in the input filter of a subsequent question is marked yellow as an example.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if answer 2 was given.

Phrases that are not already translated in English are displayed in German and preceded by [de].

151 Now we have a question about donations. We understand donations to mean money given for social, religious, cultural, non-profit, and charitable purposes without the expectation of receiving anything directly in return. It can consist of larger sums or smaller sums like those saved in a piggy bank. We also consider offerings collected at church as donations. Did you donate money last year, that is, in 2023, not including membership fees?

167 When you drink alcohol, how many drinks do you consume in a day? Please calculate based on the following example. One-eighth (.125) of a liter of wine or champagne counts as one drink. - A .75 liter bottle of wine would count as six drinks. or .33 liters of beer would count as one drink. - Two of the half-liter beers that are common in many regions would count as three drinks. Or 1 shot of hard liquor such as schnapps, whiskey, brandy, etc. would count as one drink - A double shot of hard liquor would count as two drinks.
