Reading Aid

This representation of the questionnaire contains the same informations as the portal paneldata.org.

The diagram illustrates the structure of a questionnaire question. It shows two questions, Q72 and Q73, with their respective text, instructions, and answer options. The diagram also highlights various filters and identifiers used in the questionnaire, such as 'Q72;lsta1' and 'Q73;lsta2', and explains their components: dataset name, variable name, and variable label.

Labels on the left side of the diagram:

- question number
- interviewer instruction
- answer options
- in blue: identifier for filter
- in blue: filter with condition
- grey bar: open or numeric answer

Labels on the right side of the diagram:

- question text
- in green: dataset name, variable name, variable label

Content of the diagram:

Q72 Now we would like to know something about you personally. Were you born in Germany?
This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.

Yes 1
 No 2
 No answer -1

Q72;lsta1 bio I0013 born in Germany

Q72;LSTA1=2

Q73 What country were you born in?
Please enter the current name!

Q73;lsta2 bio I0016 Country Of Birth

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown (as gatekeepers) at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].
