SOEP-IS 2011 – Questionnaire for the SOEP Innovation Sample

2017

The variable names mentioned in this document belong to a collection of datasets, which is released with doi:10.5684/soep.is.2015.1.
Reading Aid

This representation of the questionnaire contains the same informations as the portal paneldata.org.

Here, in addition to the question number, question text, interviewer instructions, and answer options, you find printed in green the file name and the variable name with the variable label, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The routing by filters is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown (as gatekeepers) at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].

Q7 We’ll start with questions about your household as a whole.

Q8 Did you already live in this flat the last time we interviewed you about a year ago?
