Series A – Survey Instruments (Erhebungsinstrumente)

SOEP-IS 2014 – Questionnaire for the SOEP Innovation Sample (Update soep.is.2016.1)

Running since 1984, the German Socio-Economic Panel study (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)

Series B – Survey Reports (Methodenberichte)

Series C – Data Documentation (Datendokumentationen)

Series D – Variable Descriptions and Coding

Series E – SOEPmonitors

Series F – SOEP Newsletters

Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at <http://www.diw.de/soepsurveypapers>

Reading Aid

This representation of the questionnaire contains the same informations as the portal paneldata.org.

The diagram shows a questionnaire entry with the following components and labels:

- question number:** Q72
- question text:** Now we would like to know something about you personally. Were you born in Germany?
- interviewer instruction:** This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.
- answer options:**
 - Yes (1)
 - No (2)
 - No answer (-1)
- in blue: identifier for filter:** Q72;lsta1
- in blue: filter with condition:** LSTA1=2
- in green: dataset name, variable name, variable label:** bio I0013 born in Germany
- grey bar: open or numeric answer:** Q73;lsta2 bio I0016 Country Of Birth

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown (as gatekeepers) at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].

Q3203 What is the power of this construction in kWpeak?

Kilowatt peak refers to the maximum the construction can deliver. This value is the power the solar panel generates in a standardized test environment, and serves as a neutral standard of comparison. Sometimes producers call it “nominal output”.

Q830 People react very differently in dealing with others. I will read out a series of statements in which different situations are described. Please specify how much each statement applies to you. If you have not experienced a situation, please reply the way you would react according to your expectation.

Q2:SAMPLE=1,2

Q83 To begin with it is about situations which result in others advantage and your disadvantage, because you were penalized, exploited or treated unfair. To what extent do you agree with the following statements?

Please answer using the following scale from 0 to 5, where 0 means “totally disagree” and 5 means “totally agree”. You can weigh your answers using the steps between “0” and “5”. Please show list 83!

Q861_intro At the following pages you will see on each screen five word formations. In each row is always just one real German word which you should know. If you find it, please point on it; You have to touch the screen at the appropriate area. If you do not know any of the words at a page, please guess. Work at your own pace; you have as much time as you want.

Please show the interviewee, if necessary, how he can activate the word of his choice and how to get to the next page using “>”.

Please turn the screen that way, so the interviewee can answer the questions in person and unobserved.

Should the participation in this test be impossible for important reasons (e.g. language problems), you can stop this test here.

Q862_intro We have prepared a little test for you, which is called “Signs and numbers”.**This exercise you can practice before. Please consider this row***Turn the laptop that way, so the interviewee can also look at the screen.*

In this exercise there is for each number for 1 to 9 a certain sign assigned (see row above).

The task is to type the right numbers for each sign, and moreover as fast as possible.

Should the participation in this test be impossible for important reasons (e.g. visual impairment), you can stop this test here.

Q862_zB Here we have an example for a solution: <row of signs> <row of numbers>

<task row of signs> <solution row of numbers>

Q862:ZZSTART=1

Q862_intro2*Please show the interviewee, how the numerical entry works with the keys from 1 to 9 and one can forward the page using the enter key.**(Regarding our attempts we could yield the fastest result by using the left hand for typing in the numbers and the right hand for using the enter key.)**Please observe the whole process, so you can help in case of problems with the entry. Should this occur, please take a note after the test!**In no case influence the interviewee regarding the recognition of signs.*

Please hand over the laptop to the interviewee now.

You can now get familiar with the test with the help of some examples.

Q862_zB3 Thank you, that was an example. Now the real task follows. You have 1 1/2 minutes. Can we start?

The test is constructed that way, so the interviewee can type in the numbers in person.

Should this not be possible for any reasons, the entry can be made by the interviewer as an exception.

The test then changes to the effect, that the interviewee has to tell the interviewer the number and the interviewer types in.

Can we start?

Yes, start (respondent types him-/herself)

Yes start (Interviewer types in as an exception)

Q100 In the following, it is about partnership and marriage. The questions are always asked in terms of the relationship, regardless of whether you got married in this relationship or not. Whether you have been married in the particular relationship or not will be clarified in subsequent questions. The questions are about both, the current relationship, as well about former relationships. We begin with the current relationship and then ask you retrospectively about the steady relationships you had before. Concerning the previous relations, we speak of a steady relationship if it lasted six months or longer.

Regarding multinational companies we ask for the superordinate German corporate entity, e.g. Deutsche Shell AG. Regarding civil service we ask for the respective administration, not civil service as a whole.

Q2632 Please enter the answers to the following questions into the computer by yourself. Please read the text carefully and take as much time as you need for the answer. If you have any questions, feel free to ask me.

After you will have opened the next screen, please turn the laptop this way, that the interviewee can look at the screen. If necessary, please show the “next” Button.

Then, please turn the laptop this way, so you cannot look at the screen anymore. Do just intervene, if the interviewee needs help.

Q2630:Vorfin1=1 | Q2631:Vorfin2=1

Q2633 Imagine, you invest 50,000 EUR from your own wealth. You can distribute the sum on the following types of investment:

1. a federal bond of Germany, with an interest rate of 4% guaranteed. 2. the German index of stocks “DAX”, who covers the economic development of 30 large German concerns.

In the following we will pay you according to your decisions on a smaller scale.

Q2630:Vorfin1=1 | Q2631:Vorfin2=1

Q2634 You split, as described, the 50,000 EUR between federal bond and DAX. We will calculate the gain, which you investment yields.

For money you invest in the federal bond, this calculation is easy: With an interest of 4%, you yield for every 100 EUR you invest safe profit of 4 EUR.

If you make profit or loss with your investment in the DAX, depends on if the DAX in the next year will increase or decrease. If the DAX for example increases by 15%, then you yield for every 100 EUR a sum of 15 EUR. If the DAX decreases by 15%, you will lose 15 EUR for every 100 EUR. This is analogue for all other percentage changes.

In one year from now we will determine, how your investments developed, and pay you both sums on a smaller scale. For every 2,000 EUR you get payed 1 EUR.

You will receive the payment soon after the appointed date from TNS Infratest as a cash cheque by post, independently of whether you are still participate in this survey or not. You can take for sure that you will receive the gain of your investment!

Q2630:Vorfin1=1 | Q2631:Vorfin2=1

Q2636 In summary: The federal bond gives in every case 4% for sure, while the investment in the DAX is linked 1:1 to the development of the next year.

Please take some time to think about, how you would like to split the 50,000 EUR between the two investments.

How much of the 50,000 EUR do you invest in the federal bond and how much in the DAX?

in the federal bond

in the DAX

Q2636:FinABC_1 inno finabc_1 Experiment: Share federal bond

Q2636:FinABC_2 inno finabc_3 Experiment: Investment in DAX

Please pay attention that the sum of both has to be 50,000 EUR.

Q2630:Vorfin1=1 | Q2631:Vorfin2=1

Q2637 In addition we would like to know from you, how you expect the future development of the DAX.

State on the next screen where you expect the DAX to be in the next year, expressed in profit or loss and compared to the today's value. We categorize the possible profits and losses into seven larger groups

loss between 60% and 90% loss between 30% and 60% loss between 0% and 30% profit between 0% and 30% profit between 30% and 60% profit between 60% and 90% profit between 90% and 120%

On the next screen you will find 20 boxes above each category. Please indicate how likely you find each profit and loss, by clicking on the boxes above the seven categories. One box refers to the frequency of 1 to 20, respectively 5%.

Please consider all for you possible developments of the DAX. By marking the boxes you show us how likely you expect a certain change of the Dax-value within each of the categories.

- If you for example do not mark any box in one category, you show us that you are sure, that this change of the DAX-value will not occur. - If you mark one or two boxes in one category, you expect this change of the DAX-value to be possible, but very unlikely. - More boxes - at maximum 20 in one category - indicate a larger likelihood.

Continue

Q2630:Vorfin1=1 | Q2631:Vorfin2=1

Q2638 Please mark now the 20 boxes according to your expectation on the DAX-profits and DAX-losses in the next 12 months. Please consider all for you thinkable possibilities. If you like to change your investment decision, please click "back".

Einleitung_DRM We would like to know now, what you have done yesterday and how you felt at the same time. First we will ask you when you got up yesterday. Then we will ask you to reconstruct yesterday with the help of this booklet. Please think of your day as a sequence of episodes between 15 minutes and 2 hours. A sign for the end of an episode could be the change of the location, the end of an activity and the begin of another activity or the change of the participating persons. Regarding some episodes we will ask further questions.

Normally episodes should take between 15 minutes and 2 hours. But there can be activities who rest longer (e.g. working). These periods should also be registered.

Explanations of the scientific employer regarding the background of the module:

One of the goals of social research is it, to find out, which elements influence the quality of our life most. Therefore scientists need evaluations of people on how satisfied they are at the moment with their life. This question we pose every year at the end of the survey "Life in Germany".

But sometimes it is not sufficient to ask people general questions on satisfaction. For this reason

scientists started to ask for people's feelings related to situations all over the day. This should help to get an impression how they feel about their life in certain moments. This allows for a more detailed picture of people's lives. Thereby one can examine, how certain activities influence the quality of life day by day.

Q266 When did you get up yesterday?

Please use the following format HH:MM. You can type in the time in this format or select the time.

Q262 Welcome!

Immediately we will present you two exercises about lotteries. Each of the exercises consists of four different lotteries. At the end of the today's survey, we will pay you two of the totally eight lotteries 1:1 in cash and euros. Which two lotteries will yield your prize, will be selected randomly.

If you have any question, you can ask the interviewer at any time.

Q262_risk_01 In the following exercise we will present you 4 different lotteries one after another.

In each lottery you will see a certain number of boxes. On each box you will find the sum of money and the probability with which each amount can be drawn. In each lottery you have to decide for one box.

On the next page we will give you some more explanations together with an example.

Continue

Q262_risk_01_probe In the example below you can see 4 boxes. Each box is labelled by the sum of money and the probability with which the related amount can be drawn. Please look at all the information on the boxes and then decide for one among them: Once you click on one box, an amount is drawn. At the end of the survey, you will get to know which earnings you have yielded.

Example:

Please think about from which box you want to draw an amount. You can finally decide for one box by clicking on it.

50% 2 Euro / 50% 3 Euro	<input type="button" value="1"/>
75% 5 Euro / 25% 1 Euro	<input type="button" value="2"/>
90% 1 Euro / 10% 10 Euro	<input type="button" value="3"/>
80% 4 Euro / 20% 2 Euro	<input type="button" value="4"/>

Q262_risk_01_probe2 In the lotteries after this example, we will draw an amount in each lottery according to your chosen box (after your final decision) and save the result. We will display all results of the lotteries at the end of both lottery exercises.

Do you have any question? Then please get to the interviewer. Otherwise you can start with the first lottery.

Q262_risk_02 Exercise 2

Each lottery consists of a certain number of boxes, which contain different sums of money. At the begin you have no information about the amounts and related probabilities in the boxes. But you can collect this information as long and as often as you like by clicking repeatedly on the boxes. With each click you can see the drawn amount for a short time in that box. Afterwards this amount disappears and you can try again.

When you have collected enough information about the different boxes, you can make your decision which one to choose. You can initiate this by clicking "Decision" below the boxes.

On the next page we will show you an lottery example to illustrate the procedure.

Q262_risk_02_probe In the example below you see 4 boxes. First fo all you can click as often as you want on each box to gather some information, which amounts are in the box. If you click repeatedly on the boxes you will notice that the amounts can occur with different probabilities.

In the following you have to decide finally for one of these boxes. From your chosen box an amount is drawn. You will see this amount at the end of this survey, and it can be part of your total gain.

Example:

Please click several times on the boxes to figure out what amounts and related probabilities to draw them belong to each box.
