SOEP Group

Running since 1984, the German Socio-Economic Panel study (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey's data collection and data processing. The SOEP Survey Papers is comprised of the following series:

Series A – Survey Instruments (Erhebungsinstrumente)

Series B – Survey Reports (Methodenberichte)

Series C – Data Documentation (Datendokumentationen)

Series D – Variable Descriptions and Coding

Series E – SOEPmonitors

Series F – SOEP Newsletters

Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at <http://www.diw.de/soepsurveyspapers>

The variable names mentioned in this document belong to a collection of datasets, which is released with doi:10.5684/soep.v34.

Reading Aid

This representation of the questionnaire contains the same informations as the portal `paneldata.org`.

The diagram illustrates the structure of a questionnaire question. It shows a sequence of elements: a question number (Q72), question text, interviewer instruction, answer options (Yes, No, No answer), and filter identifiers (Q72;lsta1, bio, l0013, born in Germany). A legend indicates that green text represents the dataset name, variable name, and variable label. A blue text represents the filter identifier. A grey bar indicates an open or numeric answer.

question number → **Q72**

question text → **Now we would like to know something about you personally. Were you born in Germany?**

interviewer instruction → *This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.*

answer options → Yes 1
No 2
No answer -1

in blue: identifier for filter → **Q72;lsta1**

in blue: filter with condition → **LSTA1=2**

grey bar: open or numeric answer → **Q73;lsta2**

in green: dataset name, variable name, variable label → **bio l0013 born in Germany**

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown (as gatekeepers) at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form `2 @ Q73`. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].

Intro The research know relatively a lot about school-age children, but only a few about the time before school. This short questionnaire is about children, they are born in 2010. The questions refer to your personal experiences and development of your child. The (birth or social) mother should responds the following questions. Your participation is entirely voluntary.

We therefore cordially request that - you allow our staff member to interview you - or you fill out the questionnaire independently.
