Reading Aid

This representation of the questionnaire contains the same informations as the portal `paneldata.org`.

The diagram illustrates the structure of a questionnaire question. It shows a sequence of elements: a question number (Q72), question text, interviewer instructions, answer options (Yes, No, No answer), and filter information (Q72;lsta1 bio I0013 born in Germany). Below the answer options, there is a filter condition (Q72;LSTA1=2) and a routing command (Q73 What country were you born in? Please enter the current name!). The filter information and routing command are highlighted in blue. The filter condition is highlighted in green. The routing command is highlighted in grey. The diagram also shows a legend for the green text: dataset name, variable name, and variable label.

question number	Q72
question text	Now we would like to know something about you personally. Were you born in Germany?
interviewer instruction	This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.
answer options	Yes 1 No 2 No answer -1
in blue: identifier for filter	Q72;lsta1 bio I0013 born in Germany
in blue: filter with condition	Q72;LSTA1=2
grey bar: open or numeric answer	Q73 What country were you born in? Please enter the current name!
	Q73;lsta2 bio I0016 Country Of Birth

in green:
dataset name
variable name
variable label

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown (as gatekeepers) at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form `2 @ Q73`. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].

Intro This questionnaire addresses household members born 1998 and are participating for the first time ever.
