The variable names mentioned in this document belong to a collection of datasets, which is released with doi:10.5684/soep.is.2017.
Reading Aid

This representation of the questionnaire contains the same informations as the portal paneldata.org.

Here, in addition to the question number, question text, interviewer instructions, and answer options, you find printed in green the file name and the variable name with the variable label, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The routing by filters is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown (as gatekeepers) at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].

SOEP Survey Papers 713
We'll start with questions about your household as a whole.

It is important to verify any change of the housing situation before the response of questions on the household. The first question is about the household composition, hence whether the persons of your household are the same and as well in the same dwelling.

4. [Survey happens for the first time in this dwelling at this address] after the new foundation of this household by moving in of at least one other participant of the survey "Living in Germany".

Q81 Now we have additional questions about your experiences with psychological counseling and therapy.

Q82 Have you ever heard or read about psychological therapies via the internet?

Internet-based psychological therapies (IPT) comprise a broad variety of types of treatment for relatively easy treatable depressions and anxiety disorders of a low or mid-grade. Following, we provide three illustrations of different types of IPT:

1. Internet-based unaccompanied treatment by self-help (without therapeutic assistance): The patient attends a structural program of self-help using a smartphone or computer for several weeks. This program incorporates specific tasks, exercises and lessons related to the problem (without personal feedback).

2. Internet-based accompanied treatment by self-help (with therapeutic assistance): The patient attends a program of self-help online under a guidance of a therapist. The communication with the therapist takes place selective via text-based feedback per email or chat.

3. Internet- or video-based psychotherapy (videoconference with a therapist): The person in therapy and the therapist communicate via webcam. Like in a conventional therapy session they meet at a specific date by appointment using verbal and non-verbal communication and feedback during the session.

Value added tax is a tax on consumption. If you as an end-consumer buy a product, this tax is already part of the price. Property tax or wealth tax has to be paid by people who own large financial assets. Germany currently has no such tax.

Title08 Now we ask you about discrimination. Discrimination means that a person is treated worse than others including specific reasons for this behavior and no factual justification. People use different modes of discrimination like insult, ostracism, sexual harassment up to violence. Rules and laws disadvantaging people are also discrimination.

I now want to pose some questions about people who come from other countries to Germany to live here.

Please read out the text very carefully.

Germany should allow less people to live in Germany, if they belong to the SAME ethnic group like the majority of the Germans.

Germany should allow less people to live in Germany, if they belong to ANOTHER ethnic group than the majority of the Germans.

Germany should allow less people to live in Germany, if they come from poorer countries outside of Europe.

In general it is bad for the German economy that immigrants come here.

The cultural life in Germany is generally undermined by immigrants.

Germany becomes a worse place to live due to immigrants.
