SOEP-IS 2019 – Questionnaire for the SOEP Innovation Sample
Running since 1984, the German Socio-Economic Panel study (SOEP) is a wide-ranging representative longitudinal study of private households, located at the German Institute for Economic Research, DIW Berlin.

The aim of the SOEP Survey Papers Series is to thoroughly document the survey’s data collection and data processing. The SOEP Survey Papers is comprised of the following series:
Series A – Survey Instruments (Erhebungsinstrumente)
Series B – Survey Reports (Methodenberichte)
Series C – Data Documentation (Datendokumentationen)
Series D – Variable Descriptions and Coding
Series E – SOEPmonitors
Series F – SOEP Newsletters
Series G – General Issues and Teaching Materials

The SOEP Survey Papers are available at http://www.diw.de/soepsurveypapers

Now we would like to know something about you personally. Were you born in Germany?

This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.

Yes 1
No 2
No answer -1

What country were you born in?

Please enter the current name!

Here, in addition to the question number, question text, interviewer instructions, and answer options, you find printed in green the file name and the variable name with the variable label, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The routing by filters is depicted in blue.

Each variable is preceded by an identifier, which usually contains the question number and which is used when the variable is used in filters in subsequent questions. Such filters are usually placed as input filters (gatekeepers) at the beginning of a question. An identifier that is referred to in the input filter of a subsequent question is marked yellow as an example.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if answer 2 was given.

Phrases that are not already translated in English are displayed in German and preceded by [de].

UE2 Household questionnaire

UE3 Dwelling

Q007 Is the respondent the head of household or the person who answers the questions about the household?

[INT] The questions on the household should be answered by the person who knows most about the concerns of the total household and the other household members.

If known, that person is identified with * in the Mein Kantar.

Important Note: The questions on the household have to be filled out once for each household. Without this question part all other questions would be useless for data analysis!

Answer questions about the household (again) 1
Skip questions about the household 2

Q008 We’ll start with questions about your household as a whole.

Q009 For the response of questions on the household it is important, whether there was any change of the housing situation or not.

The first question is about the household composition, hence whether the persons of your household are the same and as well in the same dwelling.

Please show list xxx!

What applies to your household?

Surveyed in the same home or apartment at the same address: with no other change, with the same person / same people 1

Interview in the same apartment under the same address but at least one person has joined or has left the household 2

Survey happens for the first time in this dwelling at this address after relocation of the household. The household already existed in the survey “Living in Germany”. 3

Survey happens for the first time in this dwelling at this address after the new foundation of this household by moving in of at least one other participant of the survey “Living in Germany”. 4

UE13 Innomodule Genes – Part 1

Q076 At the start of the survey, we would like to direct your attention to a special feature of this year's innovation survey. Together with the cover letter and the brochure on life in Germany - Innovation Sample you received a leaflet on the project “How the genes shape us”. In the course of this project, we want to collect saliva samples from all household members in order to obtain information on the composition of genes. INT: If there are infants or babies in the household: Please pay attention throughout the survey and during the extraction of the saliva sample in order to ensure that the materials are not within the reach of children. This is particularly true for babies who like to reach for everything they can touch.
Q077  Is the leaflet available?
Yes, leaflet is available  1
No, leaflet is not available  2
No answer  -1

Q077: gene02=2,1
Q078  INT: Please give the target a leaflet “How the genes shape us” if it is not yet available in the household. If the target person doesn’t want to read the leaflet or doesn’t want to read it, that’s ok.

Q079  INT: Please present the information manual “How the genes shape us” to the target person. Of course, if the target person does not want to read the info manual, this is also ok. Please do not apply any pressure here.
Info manual handed over  1
Info manual not handed over  2
[Info manual not passed because]

Q080  INT: Please present the data protection sheet “How the genes shape us” to the target.
Data protection sheet “How genes shape us” handed over  1
Data protection sheet “How genes shape us” not handed over  2
[Data protection sheet “How the genes shape us” not handed over because]

Q081  INT: Please answer all questions of the target person about the module “Genes”. If necessary, you can also show the target person the laminated sheet “This is what gene information looks like”.

Q082  Are you interested in participating in the study and providing us with a saliva sample?
The binding consent form will only be obtained at the end of the interview.
Yes  1
No  2
No, because:

Q083  We would like to take saliva samples from all household members. If there are children, we need the consent of the legal guardians. Are there children in the household who are allowed to take part in the project?
As a rule, the biological parents, but also possible foster parents, are entitled to parental permission. A written consent for the participation of the children is only required at the end of the interview.
Yes  1
No, there are no children in the household  2
No, child/children shall not participate  3
[No, child/children shall not participate because]
In order not to risk contamination of the saliva sample, we would like to ask [your child/children] to refrain from eating and drinking from now on. [Please make sure that the child/children do not eat or drink.] After completing the regular questionnaire, I will return to the submission of the saliva sample. It is only then when you will give your specific consent.

INT: Please select the separate questionnaire “Genes” after completing the personal questionnaire of all the interviewees present.

How would you assess the interviewee’s way of speaking during the interview? 

Note: Question only for the interviewer! INT: Please do not let the interviewee see the screen while you enter your evaluation! Even if the respondent speaks High German currently, but you notice a regional dialect, select “Slight regional dialect”. We do not refer to a foreign accent (e.g. because of a migration background or similar).

- No regional dialect at all (like the newsreader of the public television news “Tagesschau”) 1
- Slight regional dialect 2
- Medium regional dialect 3
- Rather strong regional dialect 4
- Very strong regional dialect 5
- No answer -1

Apart from a regional dialect, does the respondent speak with a foreign accent?

Please do not let the respondent look into the computer during your assessment!

- No foreign accent 1
- Light foreign accent 2
- Medium foreign accent 3
- Rather strong foreign accent 4
- Very strong foreign accent 5
- No answer -1
UE15 Innomodule Brochure

**Q088** At the beginning of this year’s personal questionnaire, we would like to ask you a few questions about the LIFE IN GERMANY brochure, which you received by post before the survey.

**Q089** What applies?

Q2000:sample=1,2

Q113 I would like to ask you a couple of questions regarding your attitude towards dishonest behaviour. How much do you agree with the following statements? Please answer using the following scale. The value 1 means: I do not agree at all. The value 5 means: I agree completely. You can weigh your answer using the steps in between. Please show list xxx!
People, who are dishonest, should be held responsible, regardless of the extent of their dishonesty.

Dishonest behaviour is more acceptable if most people act dishonestly.

People who have been treated unfairly should have more scope for dishonest behaviour.

All people should be equally held responsible for dishonest behaviour.

Q114 Thank you for your assessments on the topic “Dishonest Behaviour”. Now let’s turn to another topic.

UE22 Innomodule DAX

Q115 In the following we want to ask you some questions about financial issues. These refer to the German index of stocks (DAX), which summarizes the economic development of 30 major enterprises. We want to know from you how you expect the future development of the DAX, presented in profit or loss compared to the current value.

Group B 2

Order 1-2-3 1
Order 1-3-2 2
Order 2-1-3 3
Order 2-3-1 4
Order 3-1-2 5
Order 3-2-1 6
Q116:dax_split=1

Q118 Initially we focus on the next year (next 12 months). Do you expect the DAX to show rather profit or loss compared to the current value?

- rather increase 1
- rather decrease 2
- No answer -1

Q118:idax01=1,2

Q119 Expressed in numbers: What [Profit/Loss] do you expect for the next year overall in percent?

- 0-10000

Q116:dax_split=1

Q122 The next question concerns the period between now in one year and now in ten years. So we are talking about the nine years that will begin today in a year: Do you expect the DAX to be more likely to make a profit or a loss over these nine years compared to the value that the DAX will have in a year?

Q147 I would now like to talk to you now about the subject of taxation.

Q148 For the following questions, please hand over the laptop to the interviewee.

Q149 Dummy
Info
No Info

Q149:ife_dummy=1

Q150 Recently, numerous data leaks at tax law firms and banks have revealed various tax avoidance and evasion practices of wealthy individuals, politicians, football stars, and other celebrities. Based on these data leaks, scientific studies estimate that very wealthy households – that is, households with around 45 million euros of net assets – evade about 25% of their taxes.

Q151 Suppose there is a way to reduce your taxes by 10%. However, you find that you do not actually meet the requirements for this. However, you also know that there is no way for the tax office to check the conditions for tax reduction. Would you still take advantage of the possibility of tax reduction?

Please answer using the following scale: 1 means “Very unlikely” 5 means “Very likely”. You can downgrade your answers using the steps in between.

1 Very unlikely
3
4
5 Very likely
No answer

Q152 Please give the laptop back to the interviewer.

Q153 We are still interested in the subject of taxation. The state collects income taxes in order to cover expenditures on schools, public infrastructure, or social security. What would be a fair distribution of the tax burden in the opinion? For each of the following groups, please specify what percentage of their income the particular groups should pay in taxes. For example, if someone earns 10,000 euros and pays 1,000 euros in income tax, then the tax rate would be 10%.

Note: 0% means no tax to pay at all and 100% means that the entire income is taxed and is transferred to the state. Int. Note in case of queries: The richest 1% are those who earn more than the remaining 99% of the population. Rich persons mean that 1% of the population is richer and 90% of the population is poorer. High-income persons mean that only 10% earn more, but 50% earn less. Low-income persons are in the bottom half, i.e. 50% of the population earns more. INT: Please pay attention to the consistency of the answers. For example, if someone is in favor of a higher tax
rate for low-income persons than for rich persons, please ask again and explain the tax rate on the basis of the initial example if necessary.

What percentage should ... in taxes?

the richest 1%
rich persons (i.e. only 1% of the population earn more and 90% earn less)
high-income persons (i.e. only 10% earn more and 50% earn less)
low-income persons (i.e. 50% earn more)

Q2000:sample=1,2

Q154 Many countries, such as the Scandinavian countries or the USA, grant tax amnesties when: households report their foreign capital assets to the tax authorities. Households then pay retrospectively their due taxes, but avoid corresponding penalties or convictions. Would you support the introduction of a tax amnesty in Germany?

UE51 Innomodule Injustice - Populism - Part 3

In the following, we would like to ask you to estimate your net household income and the net income of all other households in Germany.

Net household income, which the head of household has indicated earlier, includes wage income and capital income (e.g. rental income and assets) of all members of the household after deduction of taxes and social security contributions. In addition, net household income also includes regular payments such as pensions, housing allowance, child benefit, BAföG, maintenance payments.
Q2000:sample=1,2,3

Q332 What is your estimate: What was the proportion of households in Germany in 2018 who had a lower net household income than your household?

Please enter your answer in percent. 0 percent means that you had the lowest net income of all households in Germany and thus the lowest income in 2018. 100 percent means that you had the highest net income of all households in Germany and thus the highest income in 2018. With the values in between, you can downgrade your assessment.

**UE56 Innmodule Earnings Vignettes**
In the following we will present a couple of questions, which we kindly ask you to read and answer by yourself. To get familiar with the task, please have a look at the computer screen. We present three case studies. Your task is it to assess whether the indicated gross earnings are realistic, or whether they are unrealistically high or unrealistically low. In this task, we are interested in your assessment of the indicated person's actual gross earnings and not how much you think that person should earn. Please always assume that the persons are about 40 years old, have several years of work experience, assume normal tasks in their occupations and have no responsibilities over other coworkers. Some characteristics vary across persons. For instance, they have different occupations or work times (full-time or part-time). Except for these differences, the persons are in every respect identical. We are interested in your personal assessment. Thus, please follow your own opinion!

In the following you see an example of an answer scale. You can select your answer with the pencil. Via the enter blue arrow on the right-hand side you can proceed to the next case. If there is anything unclear to you, you can get in touch with me at any time! I will now hand over the laptop so that you can read through the first case and answer the questions.

Q409 Think of all employees in Germany who work in the same profession as you. What do you think is the typical monthly earnings of full-time employees in your profession before tax deduction (in euros)?

As a typical monthly salary, we refer to the median monthly earnings, i.e. the earnings earned by the middle full-time worker in your profession, so that half of the full-time employees in your profession earn more and the other half earn less than that salary. Describe as a profession, we refer to the median monthly earnings, i.e. the earnings earned by the average full-time worker in your profession, so that half of the full-time employees in your profession earn more and the other half earn less than that salary. At this point, we refer to the occupational category according to the classification of occupations 2010 as a profession.

In the following questions, you estimate the probability that a particular event occurs. Your answers can range from 0% to 100%, with 0% meaning that something definitely will not happen, and 100% means that it will happen with absolute certainty. For example, a percentage such as... ... 2% or 5% means that something is very unlikely. ... 18% means something is unlikely. ... 47% or 52% means that something happens or does not happen with fairly equal probabilities. ... 83% means something is likely. ... 95% or 98% means that something is almost certain.

The following questions again relate to your income situation. We have calculated your current gross hourly wage based on your monthly earnings and contractual hours. Their current gross hourly wage is \[\frac{\text{gross monthly earnings}}{(\text{agreed working time} \times (52/12))}\] Euro.

What do you think is your current gross hourly wage (without taking into account overtime)? Please consider your contractual working hours and your monthly gross earnings, i.e. before deduction of taxes.

Studies show that the average full-time employee in Germany earns about 20% more than the average part-time employee. However, this difference in wages can for the most part be explained by the fact that full-time employees have on average more work experience.
Please imagine that from now on you would switch to a part-time job with 20 hours per week working time. Please think of part-time jobs that you could perform, considering your qualifications. Which gross hourly wage would you expect from such a 20 hour part-time employment?

We would now like to talk to you about your expectations for the financial market. The following questions relate to the German Stock Index DAX, which summarizes the economic development of 30 large German companies. As you may know, you can make investments whose returns depend directly on the course of the DAX. To do this, you buy shares in a so-called DAX index fund. If the DAX rises, so does the yield of the DAX index fund. When the DAX falls, the yield of the DAX index fund falls.
First of all, we are talking about next year, that is, the next 12 months: Suppose that someone would invest EUR 1000 in a DAX index fund tomorrow. Do you expect this investment to yield more profit or loss over the next year, compared to today’s value?

Q512 Now we are talking about the Consent to merge your survey data with selected social data of the Federal Employment Agency The study LEBEN IN GERMANY aims to reflect stability and change in as many areas of life as possible. In order to achieve this, it is increasingly important to learn more about people’s working lives and to us this knowledge for statistical analyses. We therefore ask for your consent to be able to use your social data on your person which are available at the Institute for Labour Market and Occupational Research (IAB). These social data include, for example.B. data on periods of employment and unemployment.
The data protection legislation requires your written consent for merging social data with your survey data. We therefore ask for your consent to use social data about you that is available at the Institute for Labour Market and Occupational Research (IAB). Your consent to the data linking is of course voluntary and can be revoked at any time. All data protection regulations are complied with, i.e. Your anonymity remains perfectly respected. After the combination of the survey data with the above-mentioned social data at the IAB, your name and address will be deleted. For more information, please refer to the form “Consent to the merging of survey data for the study"LIFE IN GERMANY" with social data provided by the Institute for Labour Market and Occupational Research (IAB)” that your interviewer will present to you.

[Int] Please now submit the form “Consent to merging survey data for the Study”LIFE IN GERMANY” with social data provided by the Institute for Labour Market and Occupational Research (IAB)”

In the case of an electronic declaration, leave a form with the interviewee. In exceptional cases: If your declaration is on paper, please personalise a form for the signature (which you send back to Kantar signed by the interviewee) and leave a copy with the interviewee.

INT: It is very important that you provide the interviewee with a consent form, otherwise we will not be able to take the interviewee into account for consent.

I confirm that I have handed over to the survey person the form “Consent to merging survey data for the study”LEBEN IN DEUTSCHLAND” with social data (according to Section 67b of the Social Code X) available at the Institute for Labour Market and Occupational Research (IAB).”

No, because:

Q514

Would you like to sign the form for the combination of survey and selected social data available to the IAB?

Interviewee fills in electronic form
Interviewee fills in paper form
Interviewee rejects the combination with social data

Q515

Now it’s about the Consent to merge your survey data with account data from the Pension insurance institutions In order to be able to describe the social change in relation to age in Germany, science needs information that is as accurate as possible. Therefore, with your consent, we would also like to use the data of the statutory pension insurance. This is information about your insurance history with the German Pension Insurance, e.g. information on the amount of your pension entitlement as of today.
**Q517** The data protection legislation requires your written consent for merging social data with your survey data. Consent is of course voluntary and can be revoked at any time. We therefore ask for your consent to allow us to use register data about you, which is available at the German pension insurance. Your consent to the data merge is of course voluntary. It can also be revoked at any time. All data protection regulations are complied with, i.e. Your anonymity remains perfectly respected. For more information, please refer to the form “Consent to the merging of survey data of the study”LIFE IN GERMANY” with the account data of pension insurance institutions”, that your interviewer will present you with.

[INT]: Please now submit the form “Consent to merging survey data of the Study”LIFE IN GERMANY” with the account data of pension insurance institutions”. In the case of an electronic explanation, leave a form with the respondent. In exceptional cases: In case of declaration on paper, please personalise a form for the signature (which you send back to Kantar signed by the interviewee) and leave a copy with the interviewee.

**Q518** INT: It is very important that you provide the interviewee with a consent form, otherwise we will not be able take the interviewee further into account for consent.

I confirm that I have handed over to the interviewee the form “Consent to merging survey data of the study”LIFE IN GERMANY” with the account data of the pension insurance institutions”

I agree that Kantar will transfer my first and last name, as well as my address and date of birth to the Institute for Labour Market and Occupational Research (IAB) in Nuremberg. The IAB combines my Survey data of the study LIFE IN GERMANY with the social data provided by the Federal Employment Agency about me, and saves the merged record without names and addresses. The resulting data set is used for research by researchers in Germany and worldwide under strict privacy policies. I was informed that when the survey data was merged with the social data as well as during the processing of this data, data protection regulations were adhered to. I have also been informed that I will always be able to withdraw my consent Just send an informal message (e-mail: datenschutz@kantar.com; Phone: +49 (89) 5600 1176). Q531 Consent to combine survey data from the study “LIFE IN GERMANY” with the account data of pension insurance institutions I agree that Kantar may send my data below to the German Pension Insurance so that my pension insurance institution can determine my insurance history and the amount of my pension as it is at present. I also agree that my pension insurance institution transmits my insurance history and the amount of my pension (as of today) anonymously and in a structured and machine-readable form to the DIW Berlin. DIW Berlin and other recipients of SOEP-data may combine the transmitted insurance data with my answers from the interview conducted by Kantar and evaluate the data in an anonymized form, so that no connection to me can be made. I have been informed that all data protection regulations are complied with. I am aware that I can withdraw this consent with effect for the future. For this purpose, an informal message suffices. Finally, I want to know more about how well your current job is aligned with your career and family goals.

For each of the following dimensions, please indicate to what extent your current job is a good match for you.

Please answer on a scale from 1 to 5. The value 1 means „Does not apply at all“. The value 5 means „Fully applies“. You can use the values in between to make your estimate. Show list xxx!
