## Reading Aid

This representation of the questionnaire contains the same informations as the portal [paneldata.org](https://paneldata.org).

The diagram illustrates the structure of a questionnaire question (Q72) and its answer options. The elements are labeled as follows:

- question number:** Q72
- question text:** Now we would like to know something about you personally. Were you born in Germany?
- interviewer instruction:** This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.
- answer options:** Yes (1), No (2), No answer (-1)
- in blue: identifier for filter:** Q72:lsta1
- in blue: filter with condition:** Q72:lsta1=2
- grey bar: open or numeric answer:** (indicated by a grey bar)
- in green: dataset name, variable name, variable label:** bio, I0013, born in Germany

The diagram also shows the structure of the next question (Q73) and its answer options:

- question number:** Q73
- question text:** What country were you born in?
- interviewer instruction:** Please enter the current name!
- answer options:** (indicated by a grey bar)
- in blue: identifier for filter:** Q73:lsta2
- in blue: filter with condition:** (indicated by a grey bar)
- in green: dataset name, variable name, variable label:** bio, I0016, Country Of Birth

Here, in addition to the *question number*, *question text*, *interviewer instructions*, and *answer options*, you find printed in green the *file name* and the *variable name* with the *variable label*, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set.

The *routing by filters* is depicted in blue.

Each variable is preceded by an identifier, which usually contains the question number and which is used when the variable is used in filters in subsequent questions. Such filters are usually placed as input filters (gatekeepers) at the beginning of a question. An identifier that is referred to in the input filter of a subsequent question is marked yellow as an example.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if answer 2 was given.

Phrases that are not already translated in English are displayed in German and preceded by [de].

## Help1 How should the questionnaire be filled out?

**Help2** Make an X in the box next to the answer option that you think comes the closest. If you make a mistake, clearly cross out the wrong answer and make an X in the correct box.

*Example:*

Yes  1

No  2

**Help3** If you change your mind and decide that you want to select the answer that you just crossed out, you will need to clearly cross out the second mistake and then make a circle around the box you had crossed out first.

*Example:*

Yes  1  
No  2

**Help4** When filling out the questionnaire, please pay attention to the instructions for each question.

*Example: Please select one answer only.*

**Help5** If there is a blank for you to write your answer in, please print your answer in the blank.

*Example:*

Country:

**Help6** Sometimes you are asked to give numerical answers. Please enter your answer by aligning numbers to the right in the spaces provided:

*Example:*

Number:

**Help7** If you should skip certain questions, there will be specific instructions:

*Example:*

Yes  1

**Help8** Please make sure:

*- that you fill out the questionnaire in black pen only. - that your answers are clearly legible. - and that your answers are inside the boxes.*

This makes our work much easier. Thank you very much!
